## Product Overview

Arsenal-00150 super hand-held metal detector, is the whole introduction of the U.S. Arsenal technology, China - Shenzhen "Zhonganxie technology" production of ultra-sensitive multi-functional hand-held metal detector. It is the most versatile and sensitive metal detector with highest performance. Widely used in bus stations, railway stations, tourist attractions, electronics factories, jewelry factories, etc. public places, it provides us with a safe working environment.

Arsenal - 00150 is a high-end product of handheld detector. Boot automatically detect, without adjustment, large scanning area ,completes detecting quickly and accurately ; has a high sensitivity, can detect tiny metal, such as: mobile phone TF memory card, pins, razor blades, etc., so it is a lot of customer purchases .

## Functions and Features

- ❖ High sensitivity;
  - ❖ Easy to use, convenient, sensitivity can be adjusted arbitrarily;
  - ❖ Superior design configuration features, elegant appearance.
  - ❖ Rugged, impact, free-fall drop height of 2 meters without damage.
  - ❖ Light weight, large detection area fast detection speed.
  - ❖ Two alarm modes: audible and vibration mode, high-brightness LED light indicator.
  - ❖ One-touch sensitivity adjustment function, easy to operate, in order to adapt to different testing requirements.
  - ❖ Continuous alarm function with low sound or vibration at the same time.
  - ❖ After installing the rechargeable battery , it can be plugged directly into the original charger to charge.
- Original line Chargers, rechargeable batteries, a portable dual charging charger (Separately)

2 The sensitivity reset button.

3 Built-in speaker holes.

4 The battery compartment. ARSENAL original battery, standard 6F22 9V battery

5 Sensitivity adjustment switch. counterclockwise--reduce sensitivity , clockwise--increase sensitivity.

- 6 Control switch. "|" Is audible alarm mode, "O" for the shutdown, "||" as the vibration alarm mode.

- 7 High brightness LED. red light--alarm indicator, yellow light-- low battery warning indicator , green light--normal standby.

## Optional Accessories

- Portable dual charging charger

Technical Standard	Technical Parameter
Product size	415mm x 85mm x 45mm
Package Size	520mm x 100mm x 50mm
Working frequency	about25 KHz
Net weight	400 g ( Without batteries )
Power supply	Standard 6F22/15F8H 9V battery or rechargeable battery
Temperature	-15°C to +55°C
Power	270MW
Packing	25/box

## Detection Range

- 1.Pin 35—70mm;
2. Type 64 pistol 220—250mm;
3. Six-inch dagger 200—240mm;
4. 20mm diameter steel balls 150mm;
5. One yuan coin 100—130 mm。

## Applications

- 1 airports, railway stations, docks probing examination;
- 2 customs, public security, border control, defense department security checks;
- 3 pharmaceutical, food quality business systems inspection ;
- 4 important places, playground safety inspection;
- 5 precious metal detection, such as gold and silver jewelry factory.
